Q1/16 and Q2/16 would like to thank the IMTC for informing us about the creation of the new AG on SVC (our TD 502/Gen). Q1/16 and Q2/16 are pleased to learn that SVC is getting implemented in products and that interoperability testing is taking place.

SG 16 would like to inform the IMTC SVC AG that Q1/16 reviewed a proposal to add support in H.241 for new H.264 profiles (Constrained High, Scalable Constrained Baseline, and Scalable Constrained High). Q1/16 experts accepted this proposal and started the approval process (AAP Consent) for Amendment 1 to H.241.

SG 16 and its relevant Questions are looking forward to further collaboration with the IMTC.
