

**We'd appreciate your sponsorship of the  
2017 IMTC SuperOp!  
May 13-19  
Prague, Czech Republic**

*"The IMTC is making Rich Media happen Anywhere, Anytime."*

The International Multimedia Telecommunications Consortium (IMTC), Inc. is pleased to announce that the 2017 IMTC SuperOp! will be held in Prague, Czech Republic, from May 13-19, 2017. SuperOp! is a multivendor, multiprotocol, multitransport interoperability-testing event. Participants include multimedia telecommunications equipment producers, protocol stack vendors, network infrastructure vendors, and multimedia and voice endpoint vendors.

**THE GOAL OF SUPEROP!** is to allow companies that manufacture multimedia telecommunications equipment to make their products work seamlessly with equipment from other companies. Because of the diversity of equipment, protocols and vendors, it is not practical or economical for a single organization to duplicate such large-scale connectivity in its own test lab. SuperOp! provides a unique opportunity to any company that produces multimedia telecommunications equipment to test their equipment and services at an unprecedented level.

This event will enable manufacturers of multimedia communications products and solutions to test the interoperability of current and future offerings across various networks.

All testing will be conducted by IMTC Activity Groups and will include interoperability and interworking tests covering various multimedia implementations ranging from mobile video telephony to the Telepresence systems. Interoperability testing will include, but will not be limited to the communication technologies such as WebRTC, RTM SDN, H.26x SVC, SIP over IPv6, SIP and H.323 Video Conferencing, Telepresence/TIP, MPEG-DASH streaming, IMS, VoLTE, RCS, Video over LTE, and many others.
